

Team Pacman

- Milestone 3 -

agenda

1. Style guide
2. Design changes
3. Our coding process
4. LoFi HTML Prototype
5. Qualitative Evaluation
6. What needs to be done
7. Time to discuss

FOODIYO

- discover new recipes -

The goal of the app is for people to discover new recipes with the ingredients they have already at home.

App designed for everybody, but more focused on the youth.

Possibility to choose your ingredients and select different food/diet types.

**How might we support young people in
finding recipe inspirations with
ingredients they already have at home
to prepare great dishes?**

what happened since milestone 2...

...coding, coding, coding...

```
    }).done(function(response) {
      for (var i = 0; i < response.length; i++) {
        var layer = L.marker(
          [response[i].latitude, response[i].longitude]
          // ,{icon: myIcon}
        );
        layer.addTo(group);

        layer.bindPopup(
          "<p>" + "Species: " + response[i].species + "<br>" +
          "<p>" + "Description: " + response[i].description + "<br>" +
          "<p>" + "Seen at: " + response[i].latitude + " " +
          response[i].longitude + "<br>" +
          "<p>" + "On: " + response[i].sighted_at + "</p>"
        );
      }
    });
    $('#select').change(function() {
      species = this.value;
    });
  });
  $.ajax({
    url: queryURL,
    method: "GET"
  }).done(function(response) {
    for (var i = 0; i < response.length; i++) {
      var layer = L.marker(
        [response[i].latitude, response[i].longitude]
        // ,{icon: myIcon}
      );
      layer.addTo(group);
    }
  });
}
```

style guide

- Design language → own customized design language
- color scheme:

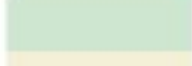

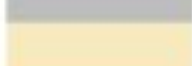

- font sizes:

$$h = 2 \cdot \tan \frac{\alpha}{2} d$$

→ minimum: 7pt

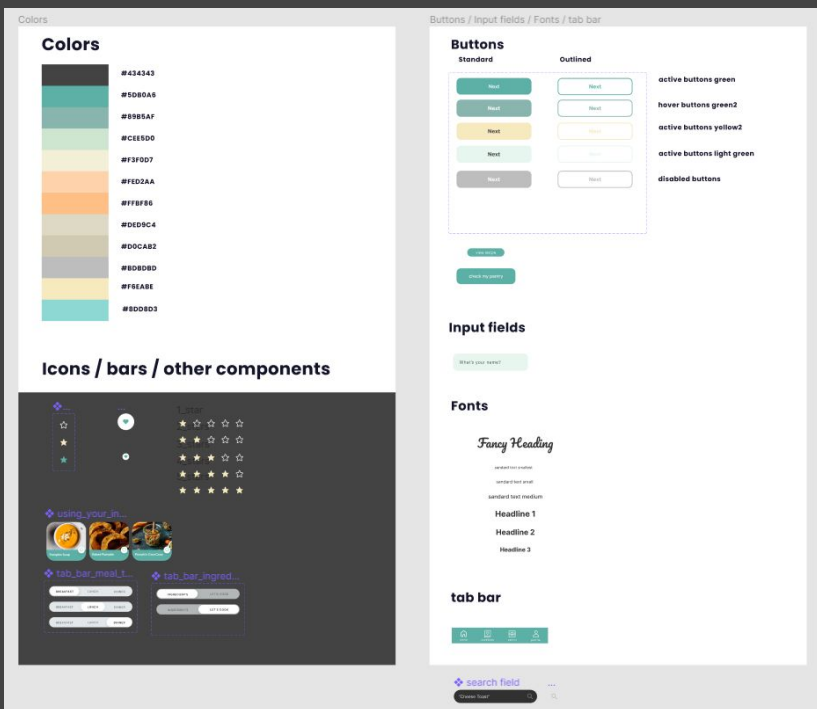

→ recommended: 10pt

Colors

	#434343
	#5DB0A8
	#89B5A7
	#CCE5D0
	#F3F0D7
	#FED2AA
	#FFB786
	#DED9C4
	#D0CAB2
	#BDBDBD
	#F6EABE
	#BDD8D3

*Figma Prototype

style guide

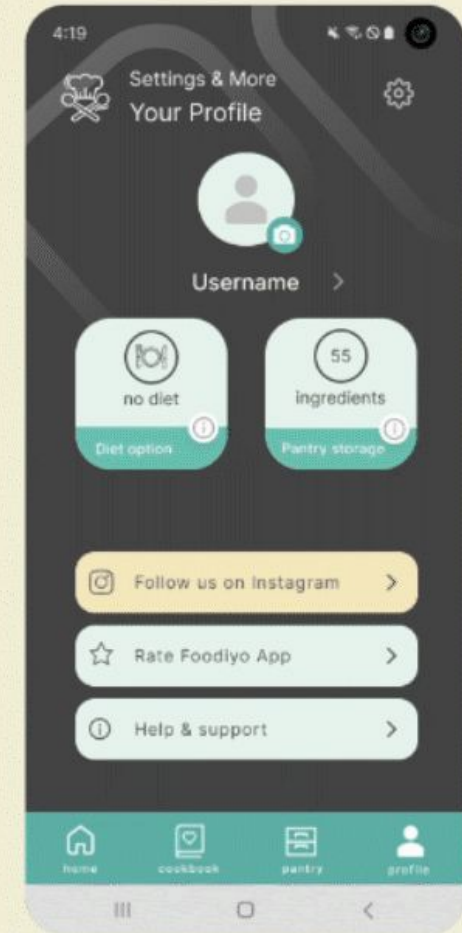

HiFi Prototype

design changes

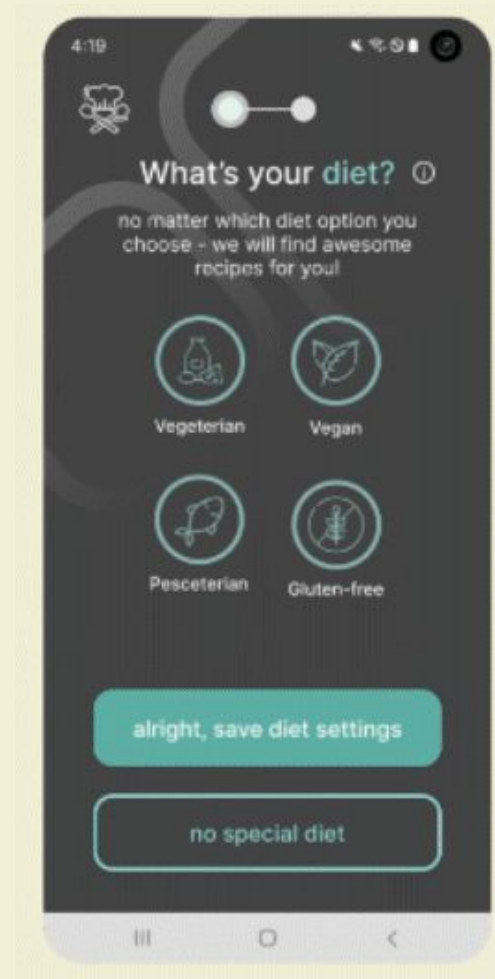

- created a user section where the user can set personal preferences (e.g. change diet settings & user name)
- included a rating option:
of course 5 stars for FOODIYO :)

*Figma Prototype

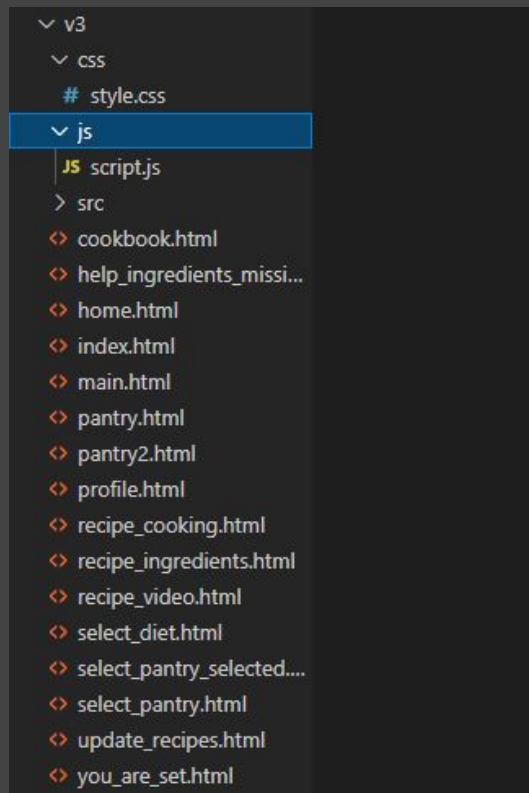

design changes

- added more “help functions” which support the user in getting information about a specific function

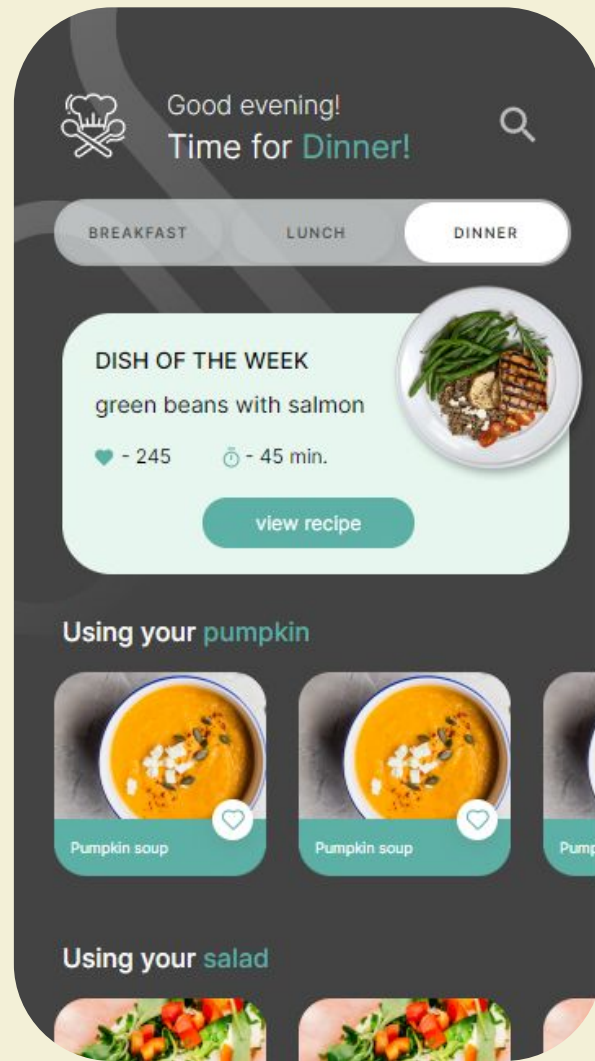

Who needs a framework? ;)

We did it the traditional way ...

*HTML
Prototype

LoFI HTML Prototype

Qualitative Evaluation

“In my pantry storage I would prefer getting a short overview with all my ingredients without scrolling!”

“I do not need a video!”

“How can I search for ingredients / recipes? The search function seems to be broken...?”

“I really like the recipe screen, the possibility to adapt servings at the beginning is great!”

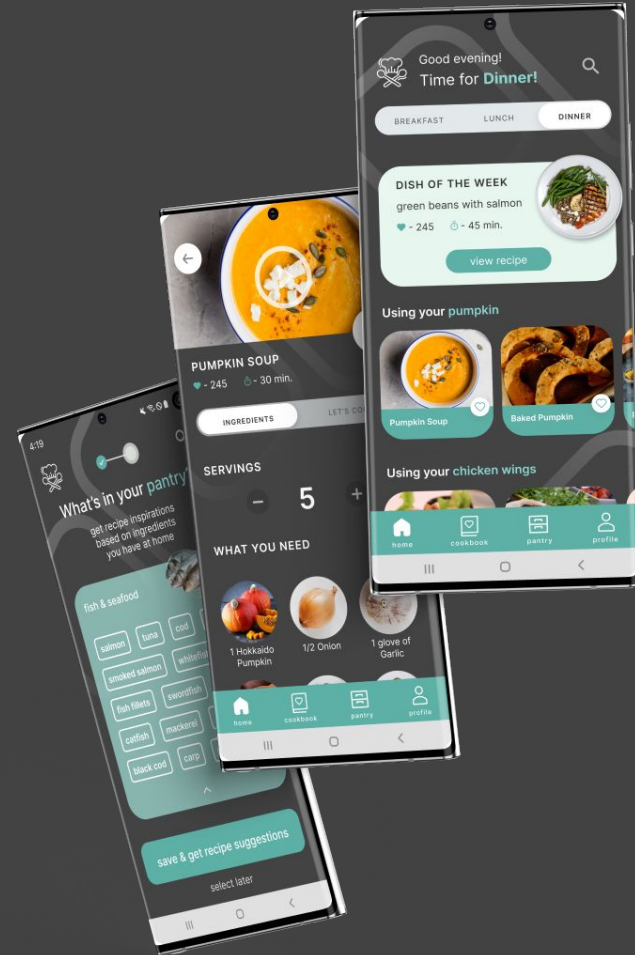

“What does ‘suggest ingredient’ mean and what’s the function behind it?”

“I like the pictures of the dishes! Also, it is nice to have a “dish of the week!”

what needs to be done..

JavaScript:

- animations
- like function: save favs in “cookbook”
- pantry: save ingredients
- user profile: change diet & save it

thanks for your attention!

Looking forward for your feedback :)
